Versalift Line of Bucket Trucks

VST-5000

VST-40

VST-7500

VST Series: The VST product line has grown from the original 41' working height VST-3600 all the way up to the 80' working height VST-7500. All models are available with optional hydraulic extending and elevating winch and jib, light axle loading, and no protruding parts beyond the front or rear bumpers. All models, including the 80' VST-7500 can be built on a single rear axle, non-FET chassis. Your crew will love the extra payload and increased maneuverability. More information on this product line at www.utilitytruck.net/teleart.html

Tel-29

Tel Series: Versalift offers a full line of telescopic aerials ranging in working height from 34' to 69'. The Tel-29 is popular with telecommunication fleets worldwide.

More information on this product line at www.utilitytruck.net/telescop.html

Vantel-29

Vantel Series: Mounts easily on a Ford one-ton van without the need for torsion bars or outriggers. Options include: DC to AC power inverters, hydraulic bucket controls, bridge mount pedestal, hydraulic leveling, splicer windows and much more.

More information on this product line at www.utilitytruck.net/telescop.html

VO-255 Flatbed

VO-255 chip box

VO Series: Versalift has a full line of articulated, overcenter bucket trucks and aerial devices ranging in height from 36' to 65', including forestry units with over 50' of horizontal reach, and heavy-duty material handlers for electric utility operations. All of these units are rugged and dependable. No cables are used in the aerial device for lower maintenance and increased operator safety. More information on this product line at www.utilitytruck.net/artover.html

SST-40

SST series: The SST series comes in both 42' and 45' working heights—available as an insulated or non-insulated boom. Highlights include maintenance free bearings, torque stripe, integral oil reservoir, chrome pivot pins, and parts painted prior to assembly. All units can be built with either outriggers or torsion bar stabilization.

More information on this product line at www.utilitytruck.net/teleart.html

Versalift Non-Insulated Platform Lifts

LT-56

LT Series: These platform lifts come in 62' and 69' working heights, have continuous, unrestricted 360° boom rotation, state-of-the-art, full-feathering joystick controls, and 180° platform rotation. Storage and tool platforms can be customized to fit long fluorescent bulbs.

More information on this product line at www.utilitytruck.net/telescop.html

VST-50-TN

VST-TN Series: This lift has features that make it great for sign and lighting maintenance. This articulating / telescopic type aerial device is available with up to 60' of working height, up to 500 lbs. platform capacity, has tremendous side reach (up to 30'-7") and stows on a short wheelbase, non-CDL chassis.

More information on this product line at www.utilitytruck.net/telescop.html
